Allowable Subject Matter

1. Claims 1 to 4, 7 and 9 are allowed.
2. The following is an examiner's statement of reasons for allowance: The Oil country tubular goods having a defined composition and exhibits excellent collapse characteristics after expansion wherein the ratio of collapse pressure after expansion and collapse pressure before expansion is in the range of a/b: 0.85 to less than 1.0 or the ratio of collapse pressure after expansion and ageing and collapse pressure before expansion is in the range of c/d ; 1 to 1.2, and wherein said oil country tubular goods has a hot rolled structure having a low α -temperature transformation phase of only bainitic ferrite or bainite alone or combined, as recited by the claims, is not taught or fairly suggested by the art of record for the reasons stated in Applicants' remarks dated April 21, 2008.
3. The applied references, Japanese patent 406184693 or US Patent 6,245,290, teach a steel tube having martensitic-bainitic microstructure whereas present invention claims recite a steel tube having **only** bainitic ferrite or bainite alone or combined.
4. The applied reference, US Patent 4,772,771, teaches a steel tube processed in a different manner than present invention such that tempered hardened martensite would be expected. The prior art teaches hot rolling followed by quenching as fast as possible to form a hardened structure (martensite) followed by tempering. In contrast, present invention steel tube is formed by hot rolling, cooling rather than quenching at about 5 to 50°C/second to obtain only bainitic ferrite or bainite alone or combined followed by coiling at not more than 300°C without tempering, as disclosed by pages 17 to 18 of

Applicants' specification. Since process of making is different, then the microstructure and collapse ratio properties as recited by the claims would not be expected by prior art.

5. For the foregoing reasons, claims would patentably distinguish over art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
